

GREENVILLE RANCHERIA

SUPPORTING TRIBES to INCREASE COMMERCIAL TOBACCO CESSATION 2022-2023

Greenville Rancheria was recently awarded funding from The California Rural Health Board (CRIHB), a Grant that would allow Greenville Rancheria to implement projects to increase commercial tobacco cessation, electronic nicotine delivery systems (ENDS) cessation and 'quit smoking' attempts by promoting evidenced-based service and activities, and/or adapting evidence-based health systems changes. The intended outcomes are to implement media strategies and/or Tribal health system changes that will:

- Increase quitting and quit smoking attempts for commercial tobacco and electronic nicotine delivery systems (ENDS) (i.e., vapes, e-cigarettes, etc.)
- Improve capacity to inform communities effectively and efficiently about evidence-based cessation services.
- Increase capability to implement evidence-based cessation services and policies to address commercial tobacco and electronic nicotine delivery systems (ENDS) use; and

- Increase capacity to identify, prioritize and customize cessation services to address community needs.

The Greenville Rancheria Community Health Care Representatives (CHR'S) intend to manage this smoking cessation program in a safe and mindful way to avoid any exposure of the Covid-19 virus. The Greenville Rancheria will adhere to California Department of Public Health guidelines of physical distancing, hand hygiene, and mask coverings.

Referrals for this program will come to our CHR'S from Greenville Medical and Dental, along with Tehama County. Greenville Rancheria's Healthcare Team will be working with patients to educate them on the dangers of commercial tobacco use, vaping, and secondhand smoke exposure. For more information contact the CHR Department at 530-528-8600, Crystal (ext. 264) or Melanie (ext. 239).

Smoking harms nearly every organ of the body, causing many diseases and affecting the health of smokers in general. Quitting smoking has immediate as well as long term benefits for you and your loved ones.
